Consult the manufacturer or a building professional for removing sliding doors which are different. It's always a good idea to pad the floor where your working if you are removing a glass door, which can be difficult to handle and easily broken. A protective cover will also prevent any damage to the floor.

How to remove an old door - Wonkee Donkee Doors

You should first remove the door. Remember, door frames will have variations in their design – if you have any doubts about removing any parts you should consult the manufacturer or a professional builder. For more information see: [How to remove an old door : Step 1 - Cut seal](#) : It's best to remove the architrave or any decorative trim first.

How to remove an old door frame and architrave

BS8214: 2008 recommends a 4mm maximum gap at the head and at the long edges as good practice but the guidance of the door manufacturer should be followed. The gap at the threshold should be no more than 6mm. It is important that the door gaps are as even as possible around the periphery of the door.
